GURU PRASAD

Azure DevOps Engineer

Mobile: +91 6309061512 Email ID: guruprasadcloud1991@gmail.com Address: Hyderabad, IN
DOB: 02-06-1991

IT professional with 5 years of experience in cloud environment management, specializing in Azure. Demonstrated expertise in IaaS and PaaS services, CI/CD pipeline implementation, and Agile methodologies. Proven ability to manage cloud infrastructure and ensure efficient enterprise application deployment and maintenance.

Professional Summary

- Successfully designed, implemented, and managed secure and scalable Azure cloud infrastructure solutions.
- Proven expertise in designing and maintaining scalable CI/CD pipelines for microservices across Multiple environments.
- Strong experience in AKS architecture, multi-env setup, namespace isolation, and ingress.
- Hands-on in building automation and monitoring solutions using Python, Grafana,Prometheus and Azure Monitor.
- Demonstrated ability to modernize infrastructure refactoring legacy setups into Terraform-based IaC with reusable modules.

Work Experience

Cloud Engineer Nov 2020 - Present

Jeta software pvt ltd (Hyderabad)

- Designed and implemented CI/CD pipelines using GitHub Actions for automated microservices deployments across Dev, QA and Prod environments in AKS.
- Created env aware GitHub action pipelines with Docker image tagging and Helm-based rollout strategies.
- Configured Grafana dashboards for SLI/SLO visualization, integrating Prometheus and Azure Monitor.
- Deployed and managed containerized applications using Kubernetes deployments for high availability.
- Configured and optimized Kubernetes workloads with Resources limits and requests for efficient resources utilization.
- Refactored brownfield infra components from Ansible to Terraform, enhancing modularity and state management.
- Built Azure Pipelines for Terraform execution, enabling CRUD operations through parameterized runs.
- Created reusable terraform modules for provisioning Azure resources including AKS clusters and Storage Accounts.
- Integrated Snyk, SonarQube, Coverity Scan and Blackduck security scans into GitHub actions and azure Pipelines for continues vulnerability assessment.
- Managed version control systems with Azure repos, GitHub Repos, optimizing branching strategies and performing code reviews.
- Engineered and maintained secure and scalable Azure cloud infrastructures, configuring and managing core services such as VMs, storage
- Configured Azure Monitor and Application Insights for proactive monitoring, alerting, and diagnostics across services.
- Secured secrets and certificates by integrating Azure key vault with CI/CD pipelines and services.
- Configured multi-stage release pipelines with approval gates and rollback mechanisms for seamless deployments.
- Created complex IAM policies for user management and delegated access with Azure.
- Integrated FluentD and Opensearch for centralized logging with dynamic config reloading across all microservices .

Technical Skills

Soft Skills

Communication
Problem Solving
Analytical Skills
Leadership
Teamwork
Adaptability
Time Management
Collaboration
Organization
Attention to detail

Core Competencies

Cloud Infrastructure Management
DevOps end to end CI/CD
Docker & Kubernetes
Infrastructure as Code
Cloud Automation
Monitoring & Observability
Agile & Delivery

Certifications

- MCSE
  AZ-104
  (2023)

Education

MBA (Jul 2017 - Jun 2019)
Gates Institute of Technology, JNTUA COLLEGE OF ENGINEERING ANANTAPURAMU

Languages

English, Telugu, Hindi, Kannada
